**NOTE**
Contact Surgeon before giving any medication marked with an asterisk. In an emergency or during Loss of Signal, begin appropriate treatment; then call Surgeon as soon as possible.

**TREATMENT**

<table>
<thead>
<tr>
<th>DRUG HELP</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Use Pepto-Bismol for ‘crampy’ abdominal pain. Antacids are indicated for ‘acid stomach’, or acid reflux with bitter taste in mouth.</td>
</tr>
<tr>
<td>2. Prilosec is not used urgently, so always start with antacids and check with Surgeon when possible. Ground will advise on indication.</td>
</tr>
</tbody>
